

Forbrain

Key Features & Benefits

Forbrain

Forbrain is a pioneering brain training device that helps people of all ages and abilities improve their speech, attention, and memory.

Thanks to years of auditory stimulation research, our patented technology enhances the natural process of the auditory feedback loop.

Simply put, this is how speech is continuously modified based on what you hear.

Forbrain modulates the voice to make it sound clearer and stimulates the brain, thus retraining your abilities. Using the device is easy and intuitive: simply wear the headphones, switch them on, and speak for a few minutes every day to boost your brain. You'll soon grow your abilities in communication, concentration, and learning.

- Patented Dynamic Filter
 - To deliver your corrected voice, the patented filter continually amplifies high-frequency sounds and softens low frequencies while blocking environmental noise.
- High-sensitivity Microphone:
 - Speak into the high-sensitivity microphone and it captures your voice's sound waves, sending the information to the dynamic filter for processing.
- Bone Conduction Transducers
 - Sound is transmitted via the temporal bones. This bone conduction delivers auditory information to the brain 10x faster than air conduction (through the ear canals).

Forbrain

Patented Dynamic Filter

Processes and produces a corrected voice that constantly stimulate the brain.

Adaptive headband

A simple design that allows everyone from 3 years old to uses Forbrain.

Bone Conduction Transducers

Enhances sound transmission via the temporal bones.

Headphone Jack

Used to listen to audio recordings of training or online classes.

Additional Microphone

For training support by the parent, teacher, or therapist.

User Microphone

Capture the sound waves of your voice.

Who uses Forbrain

School Children

Forbrain gives children from Pre-K to high school a helping hand. They learn faster and more effectively. The device is an excellent complement to regular learning activities both in the classroom and for homework.

University Student

Forbrain uses the power of your voice to grow your learning capacity. By leveraging the natural auditory feedback loop, the device provides a booster for study performance, test scores, and extra-curriculars.

Professionals

Forbrain helps professionals use their voice more powerfully, no matter whether you work in the corporate environment, performing arts, are learning a foreign language, or are interviewing for a new role.

Seniors

Forbrain is easy to use so it's perfect for seniors. No fancy apps or computers required, let bone conduction do the work for you as you reconnect to your voice for clearer, energetic communication. Experience improved attention, memory, and speech with the help of Forbrain.

Special Education Needs

Our device leverages the natural auditory feedback loop to improve skills such as speech fluency and comprehension, attention, and memory. With Forbrain, people can grow the cognitive skills and self-confidence needed for a fulfilling life.

Specialists & therapists

Forbrain is backed by years of research and is designed to support therapeutic programs. When used as a complement it can boost specialist and client efforts, and time to results. Forbrain is also suited for at-home use because it acts as a bridge in-between sessions. It's the perfect addition to your toolkit to drive client progress.

WHAT ARE FAMILIES SAYING ABOUT **OUR** **SOLUTIONS?**

“ By using Forbrain, my daughter has shown tremendous improvement in her reading comprehension and reading rhythm. Her memory is improving so much along with her confidence!

WHAT ARE PROFESSIONALS SAYING ABOUT **OUR SOLUTIONS?**

“ You can work with Forbrain for auditory issues. In the field of sensory integration, I have also recommended it, and I explain the connection with the vestibular system.
