

A man with grey hair, wearing a white polo shirt and a black watch, is standing on a green tennis court. He is holding a tennis racket with a yellow grip in his left hand. His right arm is bent, and he is using a black MYOVOLT recovery device with three orange circular sensors on his elbow. The device has the word "MYOVOLT" printed on it. In the background, a tennis net is visible.

MYOVOLT®

Recover anywhere.

Pioneers of wearable vibration.

Myovolt is the pioneer and originator of wearable vibration technology, creating an effective way to target focal vibration treatment on the body.

Myovolt has been carefully engineered by experts in wearable electronics, who have a proven track record in developing performance-enhancing technology for elite athletes and Olympic teams.

Benefits.

Reduce soreness.

Using Myovolt can quickly reduce muscle and joint soreness. Myovolt relaxes the tissues to help prevent tightness and discomfort developing.

Increase flexibility.

Myovolt massages the tissues to promote circulation and lymphatic drainage. Which removes lactic acid or metabolic waste faster, resulting in easier body movement.

Recover faster.

Recovery times can be shortened with a quicker return of flexibility and range of motion together with a reduction in DOMS (Delayed Onset Muscle Soreness).

Boost warm-up.

Using Myovolt to warm-up before exercise or training boosts muscle power off-the-mark by increasing blood flow to the muscles.

Myovolt Shoulder

Wearable vibration therapy.

Myovolt is a daily tool you can use pre and post exercise to reduce soreness and improve flexibility. This product fits comfortably around the shoulder and upper body without restricting movement.

Adjustable design.
One size fits most.

Recover anywhere.

Use before or after any physical activity. Myovolt helps to reduce soreness, increase flexibility and range of motion. Comfortable and convenient to wear, use Myovolt anywhere, anytime.

Benefits.

Reduce soreness.
Increase flexibility.
