

# HIGHTECH FOR BODYSHAPING

The high-tech fleece COOLINE SX3 has the property of binding water in the interior of the 3D material within seconds and storing it in the core or directly on the non-woven fibres.

The outer fabric is dry. Due to the normal heat production of the body, the water molecules bound in the 3D non-woven material evaporate so effectively that they set a comfortable temperature with a cooling capacity of up to 660 Watt / litre. Enough to form brown fat and still not freeze.

## PLEASANT COOL AND DRY

Due to the COOLINE SX3 technology, which is used in the SlimCOOL products, we do not reach freezing temperatures - even when pre-cooled in the refrigerator. In addition, the products are nice and dry on the outside, which is very important for a pleasant cooling sensation on the body.

CORRECTING PROBLEM ZONES THROUGH COOLING

Physicians, researchers and nutritionists now know what Hollywood stars have known for a while. Cooling makes you slim! And we at SlimCOOL® make this discovery easy, enjoyable, effective and affordable. SlimCOOL® - easy cooling for bodyshaping

## BROWN FAT LIKES IT COOL

Researchers from Harvard have discovered that people have brown adipose tissue (BAT), which breaks down white fat and makes people leaner. You can easily increase the amount of brown fat you carry by cooling! Because brown fat is responsible for warming in the body, at cooler temperatures, the proportion of brown fat in the body increases.

The body parts where brown fat is localized are located on the shoulder and neck as well as on the sternum and laterally on the upper part of the spine. To lose weight, you must increase the amount of brown fat in these areas. This can be done by simply targeting cooling at these central points with the SlimCOOL T-shirt and the SlimCOOL scarf. For more individual problem areas, you simply use the appropriate Slim-Cool product to cool down!

## LITTLE EFFORT - FAST SUCCESS

SlimCOOL is not only effective, independent of time and location, but also very simple to use. The products are activated under the tap with water in seconds. Then wear the product on the appropriate body part for up to 60 minutes while you take calls, read emails, work on your laptop or meditate on the sofa. We recommend using SlimCOOL 3 to 4 times a week, for at least 2 weeks, but ideally 4 to 6 weeks. And the best thing about SlimCOOL - you don't need to arrange appointments, you do not have to go anywhere...

**You decide where and when you want to cool!**
