# X.on

New wireless EEG headset
for research or your next business case

✕ **Full flexibility**

✕ **Research grade EEG signals**

✕ **Data recording on phone and/or streaming via LSL**

✕ **Unlimited access to raw data**

✕ **A developer's best companion**

Why X.on?

View, stream, and record brain signals quickly and easily with our intuitive Android™ app, or use a Windows® PC for streaming. Streaming functionality is powered by LabStreamingLayer (LSL).

 Want to use X.on with your iOS device?
Check out the PEER app by BrainWave Software!

Analyze and use your data to develop your own applications or understand the neural underpinnings of thoughts, behaviours and emotions.

Access your data stream online and develop your own apps to

- Analyze brain waves
- Command machines with your mind
- Understand your focus and hone your attention
- Access states of calmness
- Train your meditation skills
- Quantify the impact of your marketing efforts
